

## **SECURITIES MARKET AND MARKET MAKER ACTIVITY TRACKING SYSTEM AND METHOD**

### **ABSTRACT OF THE DISCLOSURE**

5 A method, system and computer program to monitor securities market activity to seek out imbalances in market activity that could lead to a price change in a particular security. Level 1 and/or level 2 data is analyzed to track the activity of market makers and to derive indicators of momentary upward or downward price pressure. The indicators can be displayed to a user.
